PROFESSIONAL SUMMARY

AI & Full Stack Developer with a strong foundation in web development, Generative AI, and intelligent business solutions.

Experienced in building AI-powered web applications, chatbot systems, and scalable backend APIs using Python and Flask.

Currently working with **Umti Tech Solutions** and contributing to 10+ projects related to AI platforms, chatbot development and modern business applications.

Passionate about building practical AI solutions that solve real-world business problems.

SKILLS

AI & Backend Development: Python, Flask, Generative AI, Automation Tools, AI Integrations, Chatbot Development, REST APIs

Web Development: HTML5, CSS3, JavaScript, React.js, Full Stack Development

Databases: MySQL, Postman API, VS Code

AI & Data Libraries: NumPy, Pandas, Scikit-Learn

Version Control: Git, GitHub, GitLab

Other: Problem Solving, Project Management

EXPERIENCE

AI & Full Stack Developer

Umti Tech Solutions | Jan 2026 – Present | Remote

- Developed AI-powered web applications and chatbot systems for startups and business clients.
- Built responsive frontend interfaces and scalable backend APIs using Python and Flask.
- Worked on automation tools, AI integrations, and intelligent business platforms.
- Contributed to 10+ projects related to AI solutions, web development, and business systems.
- Collaborated on modern SaaS-style applications focused on performance and user experience.
- Assisted in developing scalable digital solutions for startups and growing businesses.

EDUCATION

University of Sargodha (SU)

Bachelor of Science in Computer Science | Sargodha, Pakistan | 2021 – 2025

PAEC Foundation Girls Higher Secondary School, Chashma

F.Sc ICS | Chashma, Pakistan | 2019 – 2021

PROJECTS

EDU AI Hub – AI Tools Platform for Students

Generative AI | Flask | JavaScript | Web Application

- Developed an AI-powered educational tools platform for students.
- Integrated tools including summarizer, paraphraser, study planner, bio generator, and word counter.
- Designed responsive frontend interfaces with a user-friendly experience.
- Built a centralized platform providing multiple AI utilities in one system.

Chatbitify AI – AI Chatbot Platform

Generative AI | Chatbot Development | Flask

- Built an AI chatbot platform designed for startups and businesses.
- Developed chatbot workflows for customer interaction and automation.
- Integrated responsive frontend design with AI-powered backend logic.
- Focused on scalable chatbot solutions for business support systems.

Portfolio Website

React.js | TypeScript | Vite

- Designed and developed a modern personal portfolio website.
- Integrated responsive layouts, project showcases, and interactive UI sections.
- Added real project screenshots, live demos, and GitHub integration.
- Improved UI/UX with modern SaaS-inspired dark theme design.

Business Website & Automation Solutions

Full Stack Web Development | Flask | Automation

- Developed modern business websites and automation-based solutions for startups and small businesses, focusing on responsive design, scalability, and user-friendly interfaces.
- Built dynamic frontend interfaces and scalable backend functionality using modern web technologies and Flask-based APIs.
- Integrated forms, REST APIs, chatbot systems, and workflow automation features to improve customer interaction and business operations.
- Worked on custom business platforms including service websites, AI chatbot integrations, and management systems tailored to client requirements.
- Focused on clean UI/UX design, website performance optimization, and responsive layouts across desktop and mobile devices.
- Collaborated on multiple client-based projects, ensuring smooth functionality, modern design standards, and efficient digital solutions.

CERTIFICATIONS

Deloitte Australia Cyber Job Simulation

Completed cybersecurity and log analysis simulation tasks.

Practiced problem-solving and analytical workflows in simulated environments.

Generative AI Course – Akhuwat First

4-Month Training Program

Completed practical training in Generative AI, AI tools, prompt engineering, and intelligent systems.

Worked on hands-on AI concepts, chatbot workflows, and modern AI application development.
Improved understanding of AI integrations, backend systems, and real-world AI solutions.
